Nearly 80% of pregnant women are sick and vomit during pregnancy. Keywords: Care Plan, HyperA® Gravid Month, Place Summary The following care plan is intended for a patient with eleven weeks of management by the last rule, which presents HyperA® Gravid Month. The nursing care plan is a deliberative approach solving problems that require cognitive skills, interpersonal techniques, and that aim to meet the needs of family and community. Electrolyte μ : (hyponatraemia, hypokalaemia, hypochloremia and metabolic alkalosis). Progesterone for its effect on gastric, esophageal and intestinal motility. They simply benefit from symptomatic treatment, (anamnesis) asking for the symptoms to be started, usually pregnancy produces a gradual birth of symptoms, eating with anorexia and continuing with nausea and after vomiting the 3's vomiting in Abnormal at week 9, causes other suspicious causes. Self-medication is discouraged, and consultation should not be delayed in the more serious μ that we have described above. σ^3 $\mu\sigma$ Physiopathology of HyperA® Mesis Gravida Abstract Teaching 96). From Bachelor of Bachelor of Est. In this simple case of describing the pathophysiology of Gravidy HyperA®, the care that the nursing team will be carried out, an assessment performed by functional μ and care in one place (plan of of nurses) who are a tool for documenting and communicating the patient's situation, the expected results, strategies, μ μ , interventions as clones according to (Emma Kirk, ARIS 2006.) The symptoms of Gravidy Hyperpesis are: Intense and persistent nausea during pregnancy. It salivates much more than normal. Act interactively based on relations between μ and the patient, their family and other health problems. Gregorio Adrián Martínez García. Fetal clinic delayed intrauterine growth (CIR). The main function was to develop a nursing care plan according to the evaluation of eleven functional μ proposed by Margory Gordon, which allowed to obtain a relevant amount of data related to the health status of the patient and to carry out the individualized care plan with the scientific foundations. Sarai Guadalupe Garcon Herdez. Total or partial intolerance ingest. Aetiology The causes of pregnancy and vermin are unknown, probably since the multifactorial aetiology and the factors involved are the following (Nelson, Piercy 1989). Lombardy Prieto) Young, Nulliparase, Non-smoking, Non-smoking, Gastritis Fund, Previous Medical Hyperical Background with Recording In Pregnancies, Multiple Engravings, Emotional Stress, Women With Distrbios Food High No Strogen. μ alkalosis: hyponatraemia, hypocalcaemia, hypochloreaemia, ketosis. HyperA® grave Gravid mesis: Signs of severe dehydration, anxiety, itching, weight loss greater than 10% and oligNary. Alteration of the hep profile (obtained from GPT
